DETAILED ACTION

Examiner acknowledges the presence of claims 35-79 in the case by preliminary amendment filed at the PTO on 16 November 2004. First action on the merits is hereby withdrawn.

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 35, 37, 39, 41, 42, 44-52, 54, 55, 57, 59, 61, 62, 64-70, drawn to invention measuring frequency characteristics of an accelerometer with strain sensor, classified in class 73, subclass 1.39.
- II. Claims 36, 38, 40, 43, 53, 56, 58, 60, 63, 74, drawn to invention measuring frequency characteristics of an accelerometer with optical sensor, classified in class 73, subclass 1.41.

Claims 71-73, 75-79 are linking claims and will be examined with the elected invention.

Inventions I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination as claimed because the combination does not require an optical sensor. The subcombination has separate utility such as measuring velocity as well as acceleration.

Art Unit: 2856

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.
